CREATE A UNIFIED STAKEHOLDER VISION

Have a strong cohesive vision and rally a team of support and commitment from staff, students, and community members.

1

COLLABORATE

Ensure your school board and administration are on the same page from start to finish.

2

BE INFORMATIVE

Ensure your staff is informed early and often.

3

THE THREE Ps

Patience, perseverance, and persistence are critical.

4

COMMUNICATE

Communicate early and often.

5

WHAT TO DO NEXT?

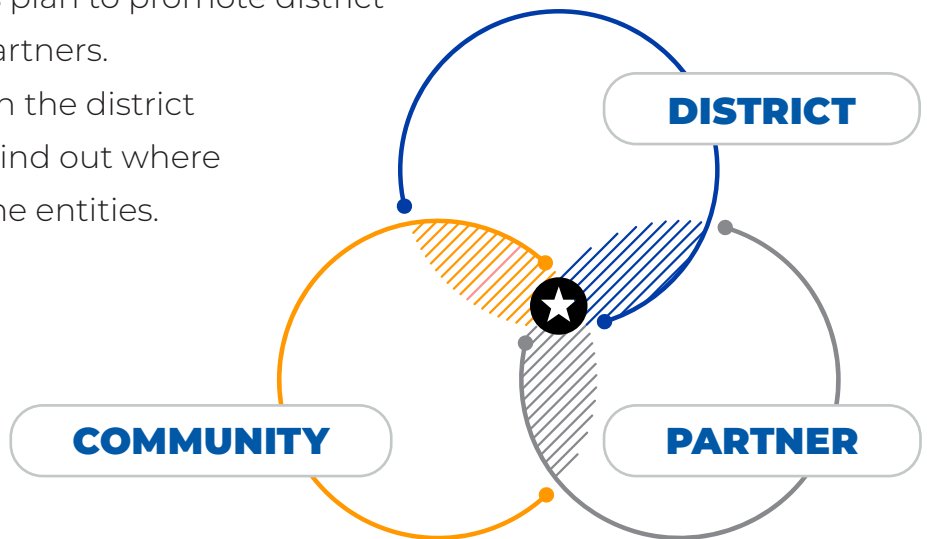

Start by asking the following questions:

- Does our district have a facility master plan? Is the board in full support?
- Do we have an updated facilities assessment of our buildings?
- Do our buildings meet our designated educational programmatic needs?
- Do we have a solid demographic study to determine future student projections?
- Have we engaged stakeholders to gain their thoughts and ideas for the future of our district?

IDENTIFY COMMUNITY PARTNERSHIPS

- Outline any previous community partnerships the district has participated in.
- Within your long-range plan, identify which improvements could be implemented with the help of a community partner.
- Outline a communications plan to promote district meetings with potential partners.
- Facilitate dialogue between the district and the organization and find out where there is overlap between the entities.

**Find the
sweet spot!**
